Development of living arrangements

- *Growing number of households even with a declining population*
- *shrinking size of households*

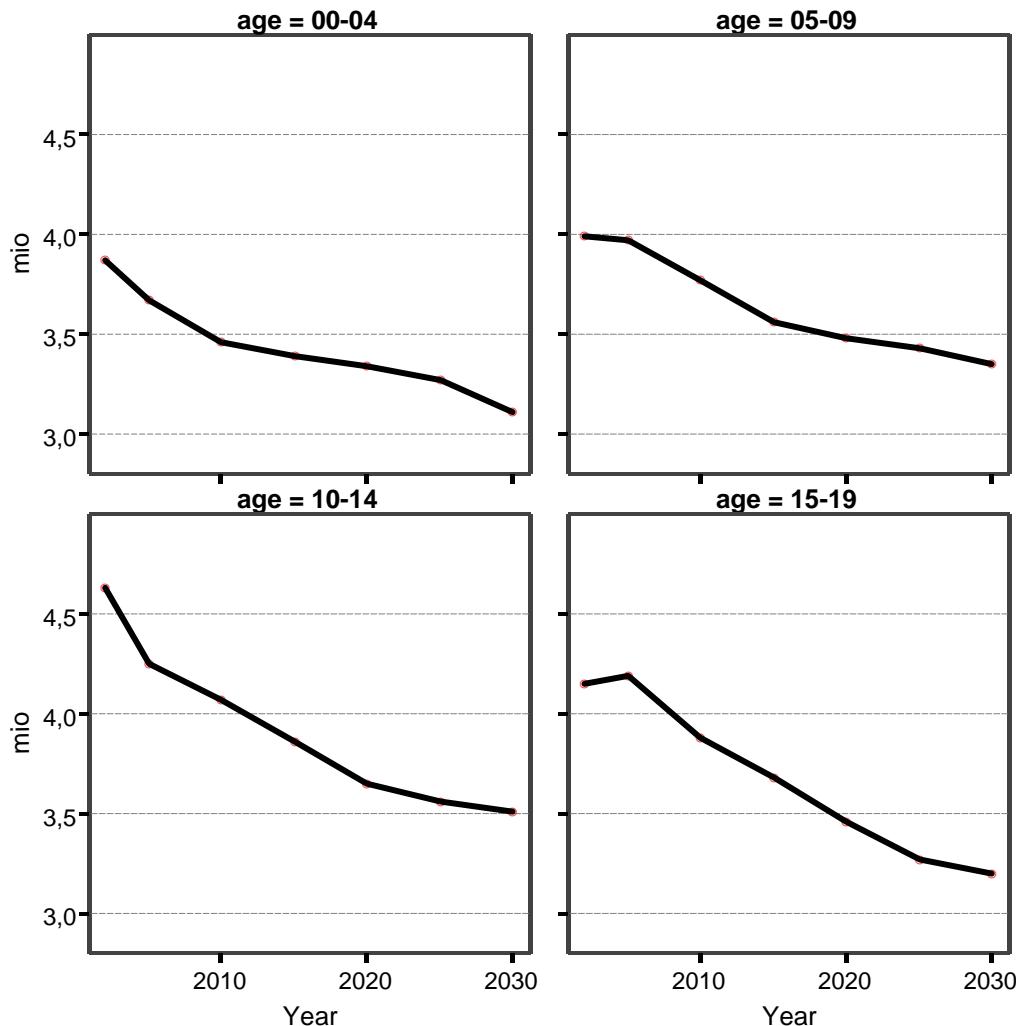

Living arrangements of children

If the fertility behaviour (total fertility, fertility by parity, mean age at birth) in the future will remain, then the structures of households with children will resemble today's structures, as regards

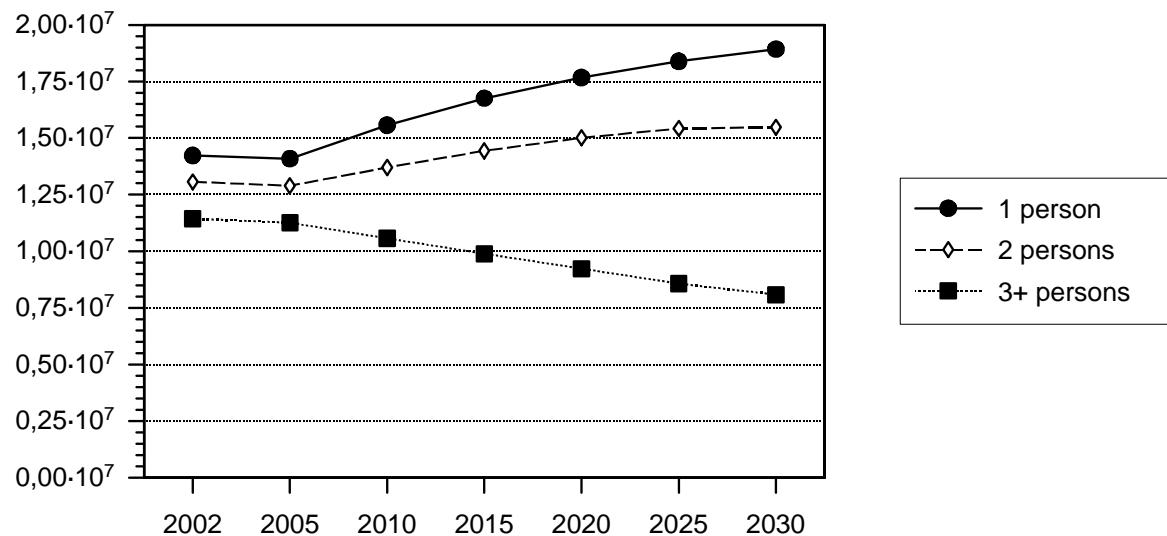

- *status of parents*
 - *number of children*
 - *number of their siblings,*
- otherwise not.*

Size of children cohorts

Germany, 2002-2030

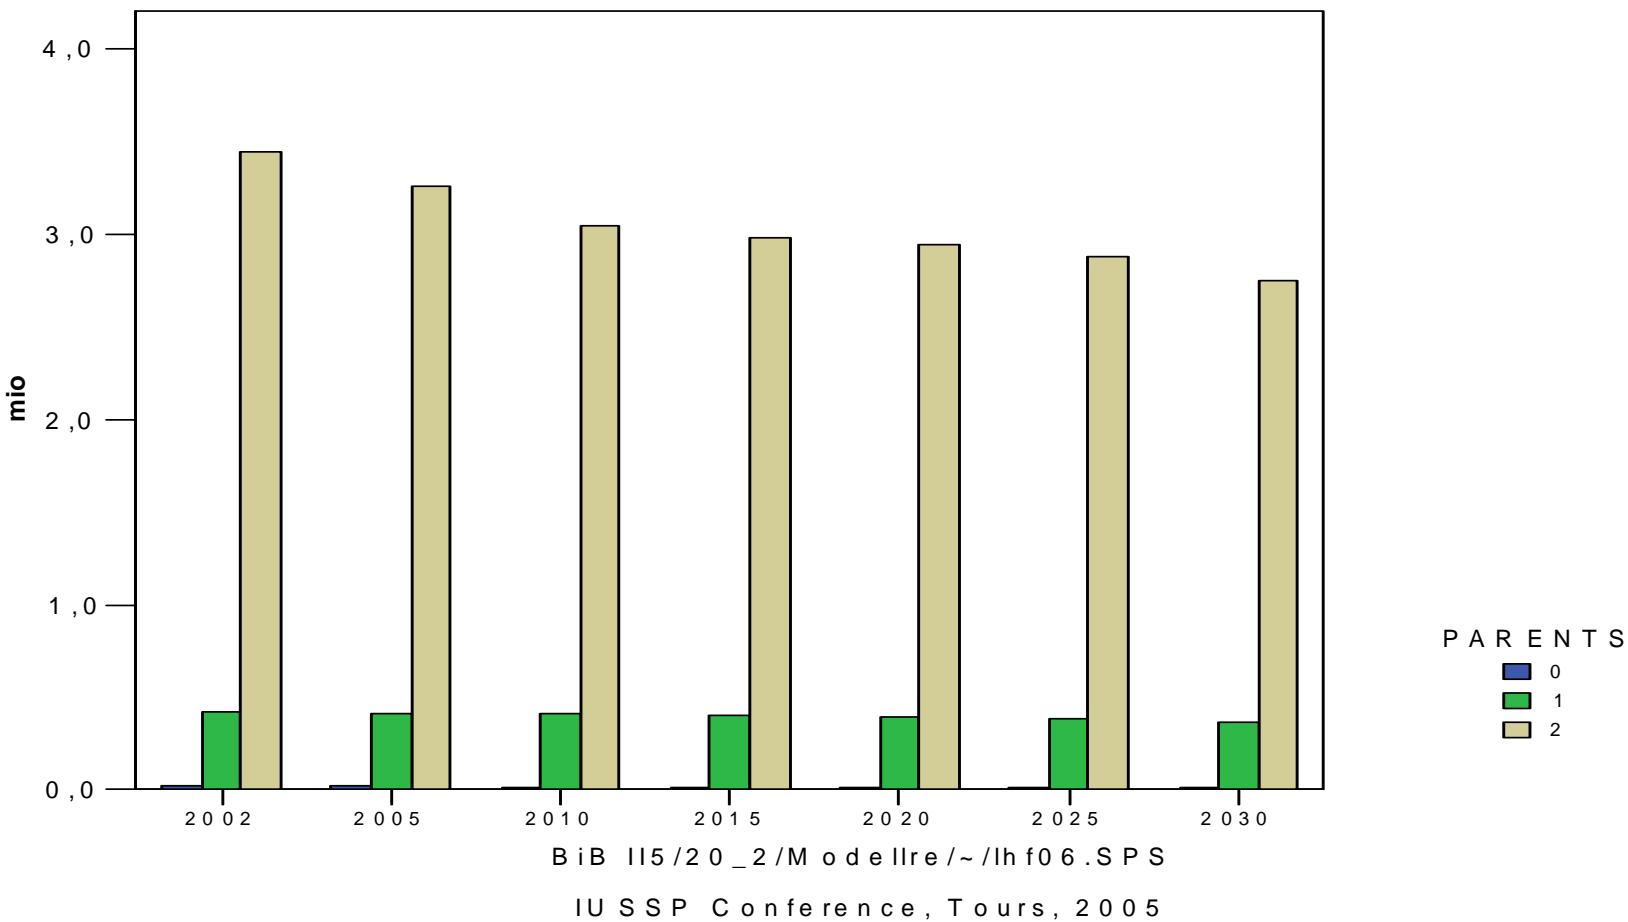

Number of households by size

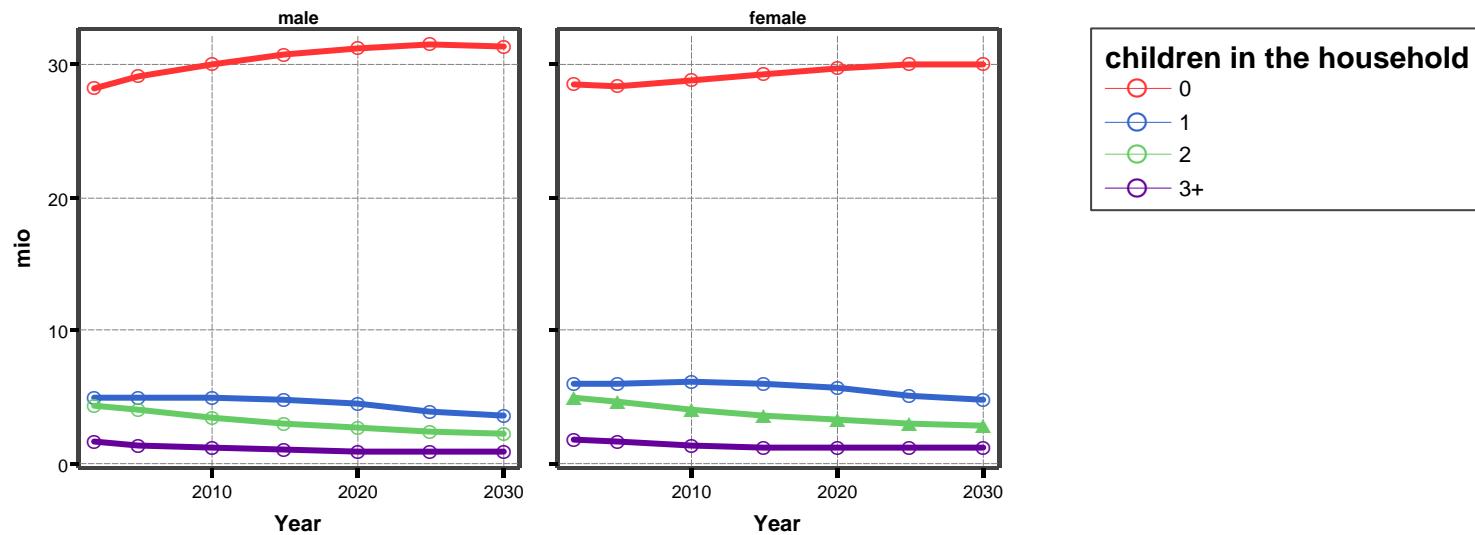

**C h i l d r e n , a g e 0 - 4 , w i t h t w o p a r e n t s r e s p . o n e p a r e n t o r
w i t h o u t c o - r e s i d i n g p a r e n t s**

G e r m a n y , 2 0 0 2 - 2 0 3 0

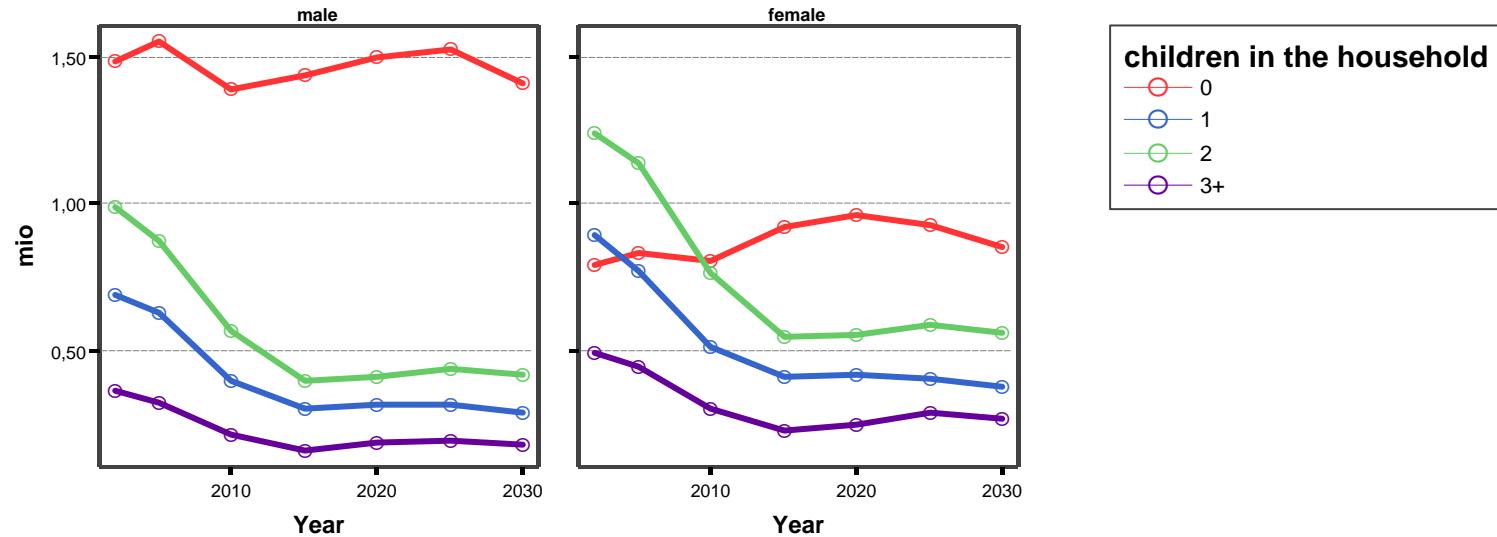

Man resp. women and number of co-residing children

Germany, 2002-2030

'BiB II5/20_2/Modellre~/~lhf06.SPS' 'IUSSP Conference, Tours, 2005'

Man resp. women at age 35-39 and number of co-residing children
Germany, 2002-2030

'BiB II5/20_2/Modellre/~lhfo6.SPS' 'IUSSP Conference, Tours, 2005'

Methods of macrosimulation with ProFamy

- *Individuals are the basic unit*
- *Individuals are grouped and projected forward by age, sex, marital/union status, number of co-residing children and parents and whether living in a private or institutional household*
- *Data requirements: base population, standard schedules, summary measures*
